SUMMARY

Senior Product Engineer with 9+ years building web products end to end. For 6 years I was the sole engineer owning a US-based DTC e-commerce stack — 50+ live offers with A/B variations, a React checkout SPA, Node.js backend, and internal admin tooling — reaching ~\$1M/month and ~1,000 orders/day. I work best with real ownership: deciding the approach, building UI and backend, integrating services, and supporting what I shipped. Strongest in React, Next.js, Node.js, and TypeScript.

EXPERIENCE

Launchify Ventures — Senior Product Engineer — E-commerce Stack

2020 – Present · Remote (US)

Sole engineer owning the full e-commerce stack for a US-based DTC business reaching ~\$1M/month revenue and ~1,000 orders/day, with 80–90% mobile traffic.

- Built 50+ live offers — blog page, interstitial, and supporting pages each, many running 3–5 A/B variations in parallel. Built as standalone HTML/CSS/JS mini-apps.
- Built a React checkout SPA shared across all offers, connected to a Node.js + MongoDB backend handling orders, billing, and admin operations.
- Built a React admin panel letting product, marketing, and ops teams configure offers, checkout flows, A/B tests, and integrations without engineering.
- Built Manna.com — a separate Next.js DTC store with its own React/MUI admin panel and Node.js backend.
- Integrated Stripe, Braintree, PayPal, Apple Pay, and Google Pay through Sticky.io as the billing backend.
- Built a retry job that reprocessed unfinished orders, recovering ~10–20% of initially failed transactions.
- Built rule-based fraud and carding protection (IP blocking, URL checks) and integrated Visa CDRN for chargeback automation.
- Built server-side tracking pipelines for Facebook CAPI, Google Ads, GTM, and BigQuery.
- Migrated video delivery from AWS S3 to Cloudflare Stream, reducing infra cost ~99%.

Sinlao Media — Frontend Engineer

2019 – 2020 · San Diego, CA

Internal analytics tool for media buyers to track Facebook ad performance and sales — tables, charts, and reporting views. Stack: React, Redux, Chart.js, D3.js.

IQ Option — Frontend Engineer

2016 – 2019 · St Petersburg

Frontend for an internal monitoring dashboard at a fintech company, within a team — React, Redux, charts and data tables, WebSockets for live data.

Greenlabs — Frontend Developer

2015 – 2016 · Remote

Cross-browser client web applications — HTML, CSS, JavaScript.

STACK

Frontend	React · Next.js · TypeScript · JavaScript
Backend	Node.js · Express · REST APIs · Webhooks · Zod
Databases	MongoDB · PostgreSQL · Prisma · Supabase
Payments	Stripe · Braintree · PayPal · Apple Pay · Google Pay · Sticky.io · Visa CDRN · Shopify
Analytics	Facebook CAPI · Google Ads · GTM · Google Analytics API · BigQuery
Infrastructure	AWS · DigitalOcean · Vercel · Railway · Cloudflare (Stream, Workers, DNS)
Testing / Mobile	Playwright · Cypress · React Native (published iOS app)

EDUCATION

K.G. Razumovsky Moscow State University — B.Sc. Computer Science

2011 – 2014 · Moscow

IBM Cybersecurity Analyst Certificate — Coursera, 2022
